

PUTNEY PLAYGROUNDS KINDERGARTEN FOOD, NUTRITION AND BEVERAGE POLICY

NQS

QA2	2.1	Each child's health is promoted.
	2.1.1	Each child's health needs are supported.
	2.2.1	Healthy eating is promoted and food and drinks provided by the service are nutritious and appropriate for each child.

National Regulations

Regs	77	Health, hygiene and safe food practices
	78	Food and beverages
	79	Service providing food and beverages
	80	Weekly menu
	90	Medical conditions policy
	91	Medical conditions policy to be provided to parents
	162	Health information to be kept in enrolment record
	168	Education and care service must have policies and procedures

EYLF

LO3	Children recognise and communicate their bodily needs (for example, thirst, hunger, rest, comfort, physical activity).
	Children are happy, healthy, safe and connected to others.
	Children show an increasing awareness of healthy lifestyles and good nutrition.
	Educators promote continuity of children's personal health and hygiene by sharing ownership of routines and schedules with children, families and the community.
	Educators discuss health and safety issues with children and involve them in developing guidelines to keep the environment safe for all.
	Educators engage children in experiences, conversations and routines that promote healthy lifestyles and good nutrition.
	Educators model and reinforce health, nutrition and personal hygiene practices with children.

Aim

Our service aims to promote healthy lifestyles, good nutrition and the wellbeing of all of children, educators and families using procedures and policies. We also aim to support and provide adequately for children with food allergies, dietary requirements and restrictions and specific cultural and religious practices. This dietary information will also be provided to families so they can plan healthy home meals for their child.

Implementation

The service has a responsibility to help children attending the service to develop good food habits and attitudes. By working with families and all educators, we will also positively influence each child's health and good nutrition at home. As stated in the *National Regulations (Regulation 79 [4])*, we recognise that these requirements do not apply to food or a beverage provided by a parent of family member for consumption by their child at the service.

In order to achieve these habits and attitudes, the Approved Provider and the Nominated Supervisor, who is responsible for overseeing all educators, will –

In relation to the provision of food and beverages

- Ensure children have access to, and are encourage to access, safe drinking water at all times.
- Children who do not eat during routine meal times or children who are hungry will be provided with foods at periods other than meal times or snack times.
- Families will be encouraged to provide food using these Guidelines.
- Provide food that is hygienic by following the relevant policies and procedures set out in the Health, Hygiene and Safe Food Policy.
- Ensure foods and beverages have a reduced risk of choking.

- Families will be provided with daily information about their child's food and beverage intake and related experiences.
- Present food attractively.
- Age and developmentally appropriate utensils and furniture will be provided for each child.

In relation to promoting healthy living and good nutrition

- Develop health and nutrition awareness and act to the best of our abilities on cross-cultural eating patterns and related food values.
- Make meal times relaxed and pleasant and timed to meet the needs of the children. Educators will engage children in a range of interesting experiences, conversations and routines.
- Discuss food and nutrition with the children.
- Not allow food to be used as a form of punishment or to be used as a reward or bribe.
- Not allow the children to be force fed without being required to eat food they do not like or more than they want to eat.
- Encourage toddlers to be independent and develop social skills at meal times.
- Establish healthy eating habits in the children by incorporating nutritional information into our program.
- Talk to families about their child's food intake and voice any concerns about their child's eating.
- Encourage parents to the best of our ability to continue our healthy eating message in their homes. This information will be provided upon enrolment and as new information becomes available.
- Encourage educators to present themselves as role models. This means maintaining good personal nutrition and eating with the children at meal times.
- Provide nutrition and food safety training opportunities for all staff including an awareness of other cultures food habits.
- Provide immediate feedback to families if inappropriate food is included in any meals provided.

Breastfeeding, Breast Milk and Bottle Warming

Healthy lifestyles and good nutrition for each child is paramount. As such, we encourage all families to continue breast feeding their child until at least 12 months in line with recommendations for recognised authorities.

We aim to work with families with children who are still being breastfed and provide a supportive environment by feeding children breast milk supplied by their families.

We will provide a supportive environment for mothers to breastfeed.

Families will be regularly reminded by educators and the service to update the service in regards to their child's preferences, habits, likes, dislikes, dietary requirements and restrictions.

Breast milk procedure

- Breast milk that has been expressed should be brought to the service in a clean sterile container labelled with the date of expression and the child's name.
- We encourage families to transport milk to the service in cooler bags and eskies; this should be immediately given to educators, who will put it in the refrigerator.
- We will refrigerate the milk at 4 degree Celsius until it is required.
- Breast milk will be warmed and/or thawed by standing the container/bottle in a container of warm water.
- The milk will then be temperature tested by educators before being given to the child.
- If the service does not have enough breast milk from the family to meet the child's needs that day, individual families will be consulted on what the service should do in these circumstances.
- To avoid any possible confusion, we will not store unused milk at the service.
- Unused milk will be returned to families at the end of the day when they come to collect their child.
- A quiet, private, lockable space with a comfortable chair will be provided for mothers/women to breastfeed or express milk. A sign will also be placed on the door when the mother/woman is using the facilities.

Educators who Breastfeed at the Service

- The service also recognises the importance and benefits of breastfeeding and that many women will return to work before they wish to wean their children. Requests for

allowances to be made for educators to continue breastfeeding once they have returned to work at the service will be treated sympathetically and reasonably and all efforts will be made to support the educator in her choice to continue breastfeeding her child.

- On return to work from maternity leave, female educators may seek to change their work arrangements. The returning staff member will have a meeting with the Nominated Supervisor to try and work out an arrangement which suits the educator, the Nominated Supervisor and also the running of the service. The service will provide Lactation Breaks for the educator to express milk or breastfeed her child. The Nominated Supervisor will be reasonably flexible as to when these occur.
- A quiet, private, lockable space with a comfortable chair will be provided for women to breastfeed or express milk. A sign will also be placed on the door when the educator is using the facilities.
- If arrangements have been made for the educator's child to come to the service to breastfeed and needs its nappy changed, the educator can use the service's nappy changing area as long as the relevant policies and procedures are followed.
- When an educator is in the process of breastfeeding her child or expressing milk, educator to child ratios cannot be compromised. Educators will work to cover the Lactation Break as they would any other break.

Safe Storage and Heating of Babies Bottles (Please display)

Microwave Instructions (Please display)

We recognise that microwaves are an efficient and safe way to heat infant formula and cow's milk, and that some parents prefer that breast milk is not heated in the microwave.

Our service will not use bottle warmers as we want to minimise the risk of burns due to the boiling water

For infant formula or cow's milk, the service will always:

- Use microwave safe bottles.
- Minimise the risk of uneven heating by adequately rotating and shaking the bottle directly after microwaving.
- Heat a minimum of 120mls of formula/cow's milk in the bottle to ensure it does not overheat.
- Only heat formula/cow's milk that has been adequately refrigerated.
- Stand the bottle up straight.
- Always take off the teat/bottle top and leave outside the microwave.
- Not use microwave ovens with wattage over 700W.
- For a 120ml size bottle – use high setting and heat for less than 30 seconds.

- For a 240ml size bottle – use high setting and heat for less than 45 seconds.
- Follow specific manufacturer instructions provided with the microwave.
